Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The indicated allowability of claims 16-18, 20 and 21 is withdrawn in view of the reference(s) to Boyd et al. (US Patent 5,667,197). Rejections based on the reference(s) follow.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Boyd et al.

Boyd et al. discloses a jig comprising a sealed chamber comprising a first plate 404, a second plate 306 and a sealing ring, wherein the first plate and the second plate produce a sealed space through the sealing ring after evacuating the air inside, see column 5, lines 38-50. Applicant should note that it is inherent that the jig of Boyd et al. comprises an air-evacuating device with corresponding air channels linking the vacuum device and the sealed chamber to create the vacuum. Also the plate disclosed by Boyd et al. could be used as carrier plates. Applicant should also note that the recitation "wherein the air pressure in the sealed chamber is reduced to a first pressure before assembling the plates,...and the second pressure is larger than the first pressure" is an intended use recitation and as such has not been given any patentable weight. A

Art Unit: 3726

recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 20 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Boyd et al.

Boyd et al. discloses an alignment jig as shown above. Although Boyd et al. does not specifically disclose the claimed pressures, however determination of appropriate vacuum holding pressure is within the general knowledge of one of ordinary skill in the art. Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made, to determine appropriate vacuum holding pressures for a particular application.

Allowable Subject Matter

6. Claims 1-15 are allowed.
